

# WP8

## Quality assurance

Led by Teach For Austria

The aim of this work package (WP) is to ensure that the project overall is managed to the highest standards and produces high quality outcomes. The main outputs of WP8 will be a quality plan, an interim and a final internal evaluation report as well as two evaluation reports on the quality of resources developed.

There are no public deliverables under WP8, as they all remain confidential to EACEA. These will be the main reports:

- The quality plan will include a risk register, an evaluation plan outlining the relevant indicators to measure the quality of the project management and implementation, an evaluation calendar and different evaluation tools and templates.
- An interim internal evaluation report will analyse the project's progress, deviations and risks until the mid-term of the project. A final internal evaluation report will summarise all findings of the internal evaluation undertaken throughout the project, measures implemented to ensure consistent quality and project progress and lessons learned.
- The quality of the resources developed under NEST will also be evaluated (mentor selection process and criteria and the planning of training and support content).
